Point-to-Multipoint CSM 130 Subscriber Module

CSM 130
Subscriber Module

The Motorola Wireless Broadband Point-to-Multipoint (PMP) CSM 130 Subscriber Module is the ideal solution for developing, enhancing and extending advanced broadband networks and services – and for making delivery of high-demand applications like Internet access, voice over IP, video services, and security surveillance much quicker and much less expensive.

Motorola Wireless Broadband products combine field-proven toughness with exceptional performance, security, ease-of-use and cost effectiveness. CSM 130 modules are available with total throughputs up to 14 Mbps for data, video and voice applications. Available in frequencies from 2.4 GHz to 5 GHz, with an array of options and accessories, CSM 130 Subscriber Modules are the right choice for building or extending broadband connectivity for government, business and residential applications.

Why Motorola Wireless Access Network Solutions are Superior

- **Industry Leading Interference Tolerance** – Motorola access network solutions provide an industry leading Carrier to Interference (C to I) ratio and utilize GPS synchronization to mitigate self interference.
- **Fast, Simple Installation** – Access Points and Subscriber Modules have easy to use alignment tools and do not require an equipment room or environment controlled area at the AP tower location.
- **Reliable Hardware Performance Over Time** – Motorola access network solutions perform in harsh weather conditions including heat, cold and moisture. Designed without heaters or cooling fans, Motorola equipment performs with high availability and reliability over time.
- **Proven Throughput Performance** – Performance specifications are statements of actual field performance, not performance in an indoor noise free lab environment.
- **Scalable as Subscriber Base Grows** – GPS synchronization enables operators to build networks that grow with demand as new subscribers are added and network density increases or as operators expand the network into new geography.
