

Motorola Wireless Broadband

Point-to-Multipoint CSM 320 Subscriber Module

Service providers need to deliver reliable, high-quality broadband service at a low investment to succeed in today's competitive marketplace. The CSM 320 is an 802.16e standard fixed, outdoor solution that provides reliable, cost-effective fixed connectivity in the 3 GHz licensed bands. Motorola's wireless broadband access network solution provides carriers, service providers and enterprise network operators a robust wireless broadband portfolio of products to deliver cost-effective, scalable, secure broadband access exactly when and where it is needed. Licensed and unlicensed solutions can be deployed at the same tower location, leveraging infrastructure costs and reducing the total cost of ownership.

APPLICATIONS

Green Field - Extend licensed coverage into new areas that are currently unserved.

Leverage Existing License - Maintain the operator license by offering wireless broadband connectivity in the licensed band.

Network Edge - Extend connectivity into low density areas on the edge of deployed mobile WiMAX coverage areas.

CSM 320 KEY FEATURES

- **Rapid Installation of Connectivity** Access Points and Subscriber Modules have easy to use alignment tools and do not require an equipment room or environment controlled area at the AP tower location.
- **Licensed Spectrum:** CSM 320 products are available in the 3.3 – 3.8 GHz spectrum.
- **Coverage and Performance:** The CSM 320 uses OFDM and MIMO technology which provides near-line of sight (nLOS) and some non-line of sight (NLOS) coverage especially in multi-path environments.
